**I currently self-identify as having dominant group privilege in four of Pamela Hay's (2016) nine ADDRESSING categories: age, disability, national origin, and indigenous heritage. In the remaining categories (religion, ethnicity, social class, sexual orientation, and gender), my membership status is mixed. As a queer woman of color who identifies as part of the Global Majority (GM), I bring an intention of holding a third space in my work with clients, aware of the biases and gifts that my unique positionality brings.*
